PREPARATION OF THE DIRECTORY

This edition of the Directory contains the names of woody plant physiologists in 46 countries. In this edition, we have attempted to expand coverage of Africa, Central and South America, eastern Europe, and Asia. Many woody plants important in these regions of the world have been added to the species list and the list of research interests has been revised. Every effort has been made to ensure that the information contained in the Directory is correct. Preparation of the Directory took place over several years, so some entries may no longer be correct. All corrections should be sent to Dr. Stephen B. Horsley, Forestry Sciences Laboratory, P.O. Box 928, Warren, PA 16365 USA.

Many people have helped prepare this Directory. Special thanks are due to Corinne Weldon, Andrew Eshelman, Susan Stout, James Colbert, Sidney Webb, Wendy Snavley, Vonley Brown, and Ariel Lugo for word processing, preparing computer macros, proofreading and checking spelling of plant names. Many individuals helped us collect names of woody plant physiologists in countries throughout the world. These individuals also are due special thanks:

HOW TO USE THE DIRECTORY

The Directory is organized into four sections, an alphabetical world directory of woody plant physiologists, a list of woody plant physiologists by country, a list of woody plant physiologists by research interests, and a list of woody plant physiologists by the important species with which they work.

- 1. The alphabetical World Directory is the master list of information about each research worker. It is organized as follows:

	Example
Last name, First name, Middle Initial	Horsley, Stephen B
Title	Plant Physiologist
Institution	NEFES, For Sci Lab
Address	P O Box 928
Address	Warren, PA
Country, Postal Code	USA 16365
Telephone Number	814/563-7587
Research Interest Codes (1-21)	6 7 11 16 20
Species Codes (1-801)	458 51 53 336 324
Species Codes	134 135

Woody plant physiologists from 46 countries are included in the Directory. A list of countries is found on page iv. Each scientist was asked to choose his research interests from 21 research interest codes. These are listed on page v. Furthermore, scientists were asked to list up to 15 important species with which they worked. A list of 801 important species begins on page vi.

- 2. The list of woody plant physiologists by country gives the last name, first name, and middle initial of woody plant physiologists in that country who are included in the Directory. Scientist names are listed alphabetically within each country and countries are listed alphabetically.
- 3. The list of woody plant physiologists by research interest gives the last name, first name, and middle initial of woody plant physiologists working in that research interest area. A scientist's name may appear under several research interests. Names are listed alphabetically under each research interest.
- 4. The list of woody plant physiologists by important species with which they work gives the last name, first name, and middle initial of woody plant physiologists under each woody plant with which they work. Scientist names are listed alphabetically under each plant name and plant names are listed alphabetically. Plant names are given in Latin by genus and species. For some plant groups, the genus name also is listed. For example, the genus name *Pinus* is listed at the beginning of the list of *Pinus* species found in the Directory.
